**Subject:** [External] DEQ re ACP

CAUTION: External email. Do not click links or open attachments unless verified. Send all suspicious email as an attachment to report.spam@nc.gov.

To the Honorable Governor Roy Cooper:

Please help us in our fight against the proposed pipeline. We are asking if you could please authorize the DEQ to IMMEDIATELY plan for at least three or more public hearings along the proposed ACP corridor to address the economic development, health, safety and environmental concerns being raised, as well as claims and information submitted by the Atlantic Coast Pipeline (ACP, LLC) since the close of the original comment period. We ask that you take a firm stand against the ACP as you have against offshore drilling.

I don't know if you have seen any of the videos as to what happens when these compressor stations frack gas: children and adults with serious nose bleeds, severe headaches, respiratory problems, polluted water, the very, very loud noise, etc. Fracking emits poisonous gases. If you or your staff would view these videos, you could see first-hand the problems with these proposed pipelines, and compressor stations. There are a lot of heart breaking stories of how the elderly are having to give over their land that has been in their families for over a hundred years (eminent domain--another wrong).

I am originally from Southern California. I moved here 14 years ago with my husband. After moving here, I understood why he wanted to come back home. Buckingham, Virginia is a beautiful place, and one of the most serene, with no pollution--lots of clean air, and good well water. But now ACP and the largest compressor station with 54,000 plus horsepower is proposed to be in our area. We live in an agricultural area, where we raise crops, cattle, dairy cows, donkeys, goats, and chickens.

I could go on and on; but, I want to THANK YOU for taking time to read my letter.

Respectfully,

Ruby Laury  
Resident of Buckingham County and  
Member of Friends of Buckingham
